CARDONE TURBOCHARGERS

Everything **YOU** need in a
Turbo program. Everything your
CUSTOMER needs in the box.

New & Remanufactured Turbos

Future market growth for turbochargers is estimated at 18% a year, which translates to a doubling of the market every four years. With over 50% of production vehicles featuring a turbocharger by 2025, the need for solid aftermarket solutions will increase as well.

To stay ahead of the curve, CARDONE has expanded its line of remanufactured turbochargers for light and medium-duty diesel trucks and introduced 100% brand-new turbochargers that cover key diesel and gasoline passenger models.

- Best coverage in the market with over 94% of the addressable applications available
- Remanufactured with proprietary processes to meet or exceed O.E. specifications
- Reassembled with full dynamic balancing and new bearings and seals
- Remanufactured in the U.S.A.
- 100% New CARDONE Turbochargers include all required sensors and actuators

Key Applications

2N115 (No Core Charge) List Ea. \$933.45 Jobber Ea. \$466.72
2011-2017 GM/Buick 1.4L Gas Cruze, Trax, Sonic, Encore
VIO: 1,400,000

Escape, MKZ, MKC, MKT
VIO: 1,000,000

Full Installation Kits

CARDONE is among the few manufacturers that provide full professional installation kits with every turbocharger it ships, helping ensure technicians have the tools they need to get the job done right. The exact components vary by application, but the kits include:

- All gaskets, o-rings, and mounting hardware needed to complete the turbo installation
- A pre-lube syringe which protects the turbocharger and simplifies installation
- Replacement components, like oil feed lines, that have high failure rates and typically require replacement with the installation of a turbocharger
